A further very steep low-pass filter, synchronised to the signal frequency, can be applied at the end of the signal path to absolutely ensure that no unwanted out-of-band signals remain.. Undesired artefacts are not present in the processed signal Only wanted artefacts remain.. Decimort can process the right and left channels of a stereo signal completely independently.. Decimort has no internal aliasing The only aliasing effect present in the system is the modelled aliasing of the classic samplers..
